## DASSAULT SYSTEMES K.K.

Company Profile · Business details

Dassault Systèmes aims to realize a "generative economy" and sustainable communities through the provision of its 3DEXPERIENCE platform and Virtual Twin technology. Virtual Twins go beyond system modeling to enable simulation, prediction, verification, and optimization. By comprehensively reproducing the entire product manufacturing process, as well as the diverse systems that make up local communities, such as transportation, disaster prevention, energy, and environmental conservation, and verifying them before the implementation in the real world, we support environmental optimization toward decarbonization. We utilize science-based virtual twins to tackle social challenges together with startups, industry leaders, government and local governments, and citizens.

## EAST JAPAN RAILWAY COMPANY

Company Profile · Business details

TAKANAWA GATEWAY CITY, directly connected to the Yamanote Line, is built around the concept of a “Global Gateway,” offering excellent access to Tokyo International Airport and the upcoming Linear Chuo Shinkansen. Designed as one of Japan’s largest urban experimental site, the district serves approximately 100,000 daily visitors and focuses on developing and implementing new solutions in key areas such as environment, mobility/robotics, and healthcare.

In the city, the newly opened business creation facility “LiSH” (TAKANAWA GATEWAY Link Scholars’ Hub) aims to foster the creation of new businesses and culture by connecting and integrating diverse, cutting-edge knowledge and technologies from various “Scholars.” Currently, around 150 companies have convened in the area, with more than 80 co-creation projects already underway.

## ZET-BASE KYOTO

Organization Profile · Organizational activities

ZET-BASE KYOTO is an incubation facility equipped with coworking and shared office spaces, designed to foster the clustering of decarbonization-related startups, promote open innovation, and support demonstration projects for decarbonization technologies.

As the first hub under Kyoto Prefecture’s “ZET-valley Initiative,” it is operated through collaboration among industry, government, and financial institutions, and provides tenant companies with support including mentoring and hands-on business development assistance, fundraising support, and co-creation opportunities with local companies and universities.

We look forward to your visit !
